

IN THE SPECIFICATION

Please amend the paragraph on page 7, spanning lines 6-15, as follows:

Once the URL has been selected, an input window may be displayed utilizing the network browser application for allowing the selection of one of the intellectual property identifiers. See operation **306**. Such selection may include manual entry of one of the intellectual property identifiers, or the selection thereof via a list. More information on one exemplary embodiment of such window will be set forth in greater detail during reference to Figure ~~[[7]]~~**4**. In an alternate embodiment, the appropriate intellectual property identifier(s) may be identified in a window separate from the network browser application, such that any competing activity documentation selected during use of the network browser application results in automatic correlation with the pre-selected intellectual property identifier(s).
